

Blephagel®

**Sterile gel for daily cleaning
and hygiene of eyelids
and eyelashes**

**Hypoallergenic*, tested under
ophthalmologists control,
Preservative, alcohol and
fragrance-free**

Form and packaging:

Sterile cleansing gel for eyelids
and eyelashes.

30 g Polydose airless™ tube.

Ingredients:

Aqua, poloxamer 188, PEG-90,
carbomer, sodium hydroxide.

Indications:

BLEPHAGEL is a hypoallergenic*
sterile gel for daily cleaning of
eyelids and eyelashes.

Eyelid hygiene is recommended by
ophthalmologists and optometrists
when you have the following
conditions:

- Blepharitis (anterior and
posterior) (inflammation of the
eyelids),
- Dry eye associated with
meibomian gland dysfunction
(glands located inside the
eyelids which do not work
properly),
- Eye and eyelid damage due to
acne rosacea (disease of the
skin on the face which causes
redness),
- Eye and eyelid damage due to
seborrheic dermatitis (disease
of the skin on the face which
causes redness and scaly skin).

Eyelid hygiene can also be
recommended before surgery
only if advised by your doctor/
ophthalmologist, when careful and
thorough cleansing of eyelids and
eyelash roots is needed.

BLEPHAGEL can be used
by contact lens wearers. It is
advisable to remove contact
lenses before using BLEPHAGEL.

Properties:

BLEPHAGEL is a sterile gel

formulated for gentle and thorough
cleansing of irritated or damaged
eyelids, or skin which is sensitive
or likely to have allergic reactions.

BLEPHAGEL original formula:

- contains the ingredient
poloxamer which emulsifies,
makes soluble and gently
removes mucous and debris
from the eyelids and eyelash
roots,
- hydrates eyelid skin,
- refreshes, softens and soothes
eyelids,
- leaves no residues, and is not
oily or sticky.

Precautions for use:

- Use on the eyelids and
eyelashes. Do not put in the eye
directly.
- Throw away the tube 8 weeks
after first opening.
- Do not store above 25°C.
- Do not cut the tube (risk of
contamination from bacteria).

**KEEP OUT OF THE SIGHT AND
REACH OF CHILDREN.**

Frequency of use:

Use BLEPHAGEL twice daily,
morning and evening, or as many
times as your eyelids need to be
cleaned.

Instructions for using

When first using, gently press the
front of the tube (on the Thea logo)
for 3 seconds, to push the gel
towards the pump.

Next, point the tube downwards
and prime the pump by pressing
the head 3 times.

- 1** Press the
head (pump)
to release a
small amount of
BLEPHAGEL
on to a pad (do
not press the
tube). Remove
any gel left on
the tube nozzle
with the pad.

2 With the help of a mirror, close one eye and gently apply the gel to the closed eyelid and eyelash roots.

3 Using circular movements, gently rub the eyelids and eyelash roots and continue until all dirt, make-up and other debris have been removed.

4 Remove any excess BLEPHAGEL from the eyelid with a clean pad.

5 Repeat these 4 steps for the other eye.

Steri-Free Technology:

Laboratoires Thea is a company which specialises in eyecare products, and a pioneer in the field of sterile preservative-free products. We developed the first ever preservative-free multidose bottle: the ABAK system, and we continue to innovate with Steri-Free Technology which allows a gel for the eyelids to remain sterile even after opening and without addition of preservatives.

Steri-Free Technology is a combination of 3 innovative and exclusive processes:

1. A formulation that has no harsh ingredients and provides a high level of comfort for the eyelids and skin. The gel includes ingredients selected for their effectiveness.
2. Sterile before opening thanks to a new and innovative manufacturing process in a sterile environment, which produces a sterile and preservative-free gel.

3. Sterile after opening thanks to a new and innovative packaging: the Polydose airless™ tube keeps the gel sterile without preservative for the whole time that the tube is being used.

Steri-Free Technology:

- Guarantees sterility and quality of the gel after opening the tube.
- Protects the gel against contamination from bacteria after opening.
- Produces a gel with high comfort of use due to no harsh ingredients.
- Allows only ingredients used for a better action and less side effects.
- Enables simple and very easy gel application by the airless pump.
- Enables accurate and regular dosage by the airless pump.

Laboratoires Thea, is an expert in eyelid hygiene and offers a complete preservative-free range for daily eyelid cleaning.
